Subject: Meeting Report

I request you to check and correct the Meeting Report of DLK Uses Forum as following points:

1. Your report said "test phase leading to operation in late-2006." Actually, the date is 2005, not 2006.
2. MTSAT for ATS services, there will be no cost. Yes it's free but for only to/from Tokyo ACC or ATMC.
3. The ORT editor will be available for aircraft engineers/operators, who applied to JCAB for using MTSAT, until the end of September before operational test is started.
4. but not for ATC as primary (Primary; CPDLC, Secondary; HF communication, Third; SATCOM-Voice)
5. My correct e-mail address is: oota-m2sf@mlit.go.jp

Masaaki Ota

Secretary's note: The MTSAT was successfully launched on 26 February 2005.

Subject: Correction request

Dear Michael,

Please, could you correct part of the FANS B presentation summary. The report stated

“The upgrade would involve a dual ATSU and a dedicated FANS HMI integrated architecture.”

I would like you to mention "The upgrade would involve a dual **stack** ATSU and a"
In order to avoid any misunderstanding.

Thanks in advance,

Best regards,
Agnès LECLERCQ
